Experience

Software Engineer

Wellspring - Chicago, IL · June 2020–Present

- Developed client-focused software solutions in PHP, collaborating with project managers and the QA team to ensure quality and timely delivery.
- Streamlined development workflows by creating Jenkins jobs and command line tools with Python.
- Authored extensive documentation and engaged in peer programming to enhance team collaboration and knowledge sharing.

Full-Stack Developer

Schafer Condon Carter - Chicago, IL · January 2018–November 2019

- Created a framework and CMS system for building websites using Sass, JavaScript, and Python.
- Developed a cross-browser automated testing system to streamline QA using Python and Selenium.
- Built and managed client websites using Django, Wagtail, and Adobe Experience Manager.

CS Lab Configuration Management Intern

Wheaton College Computer Science · May 2017–November 2017

- Collaborated with the CS lab system admin to implement the Salt configuration management system.
- Contributed to the Salt open source project with bug fixes and feature implementations.

Web Application Developer

Buswell Memorial Library · August 2016–January 2018

- Built bespoke, responsive web apps to streamline workflows for various departments.
- Developed features, fixed bugs, and created unit tests for the Coral open source project.

IT Developer & Software Deployment Engineer

Wheaton College Academic & Institutional Technology · May 2015–August 2017

- Built a dashboard web app for the service desk to display important information for technicians.
- Developed scripts to automate support procedures and streamline service desk workflows.
- Packaged and deployed software for automated installation on campus computers.

Service Desk Supervisor

Wheaton College Academic & Institutional Technology · October 2014–August 2017

- Provided tech support to students and staff for hardware, software, and network issues.
- Trained, supervised, and assisted service desk technicians.
